Machine Learning and Data Mining

New announcement from Azadeh Mohammadi

Kaggle dataset

Dear all,

I hope you are doing well

Following some students' inquiries about using datasets from Kaggle, we would like to clarify that while Kaggle was not a recommended data source and has not been introduced as a suggested repository in the data assignment brief, it is acceptable if you have already used a Kaggle dataset for your assignment.

However, please ensure that your code and report are entirely original and do not show any similarity to existing works or publicly available notebooks (when you are using Kaggle data or any other resources). As you are aware, any form of similarity (in codes or reports) constitutes academic misconduct, which the University treats very seriously.

If you have only selected the dataset from Kaggle and conducted all other work independently and there is no similarity, that is perfectly fine.

Best wishes

AM
